The Price Is Right Gallery Walk

Name: _____

Date: _____

Class / Period: _____

Unit / Lesson:
Unit 1: Budgeting & Planning —
Lesson 1.1: Introduction to Budgeting

DIRECTIONS

- You will rotate through four stations. At each station, **make your estimate** before the classroom sample price is revealed. Then record the fictional classroom sample price and calculate the positive difference — how far apart the two amounts are.
- To find the positive difference, **subtract the smaller amount from the larger amount.** Do not record a negative difference.
- The sample prices in this activity are stable practice values. They are **not claims** about current local prices.

HOW IT WORKS

1. **Estimate** — Look at the item and write your best guess.
2. **Reveal** — See the classroom sample price.
3. **Compare** — Calculate the positive difference between your estimate and the sample price.

PART 1: ESTIMATE, REVEAL, COMPARE

Record your estimates, the sample prices, and the **positive difference** for each station.

Station	Exact Sample Item	My Estimate	Sample Price	Positive Difference (How far apart?)
01 Monthly Phone Plan 	Basic prepaid phone plan	$ _____	$ _____	$ _____
02 Monthly Transportation Pass 	Fictional city youth transit pass	$ _____	$ _____	$ _____
03 One Entertainment Outing 	Movie ticket + snack	$ _____	$ _____	$ _____
04 Everyday Personal/Tech Purchase 	Basic phone charging cable	$ _____	$ _____	$ _____

Find the Budget Lesson

PART 2: REFLECT & CONNECT

Use what you learned from the stations to answer the questions below. Write your thoughts in the spaces provided.

01 Which estimate was closest to the sample price?

02 Which estimate was farthest from the sample price?

03 What surprised you about the differences between your estimates and the sample prices?

04 How could underestimating several costs affect a monthly budget?

TRADE-OFF REMINDER

Choosing more money for one part of a budget can mean having less available for another part.

BRING IT BACK TO THE BUDGET

What did this activity show you about using estimates in a budget? When you build Devon's budget next, what will you remember about choosing amounts for variable expenses?
